

MEDICAL DEVICES

Ease the flow of care

**FRESENIUS
KABI**

caring for life

Fresenius Kabi forms an integral part of the care given to millions on a daily basis.

Our success lies in our culture, which is based on a combination of quality products, plus high standards in both manufacturing and safety practices.

This culture is directly linked to and inspired by the knowledge we have gained in the fields of both Pharmaceutical and Nutritional care.

Fresenius Kabi Medical Devices has integrated five specific core competencies to make the process of preparing and administering clinical fluids more efficient.

Our competencies in container design, filter technology, clinical fluids processing equipment, disposables and administration equipment enable us to provide solutions that go way beyond simply supplying products.

It means we can ensure that homecare organizations, blood banks and hospitals continue to run like clockwork - around the clock.

From preparation to administration, **Fresenius Kabi** provides medical devices and solutions that ensure the flow of care is safe and efficient.
